

HAIRATIN

USAGE MANUAL

INSTRUCTIONS:

Hold the bottle 2-3 inches above the thinning area at a 45-degree angle. You can adjust the tilt to increase or decrease the amount coming out of the bottle. Apply Until the scalp is no longer visible.

Pad and shape your hair very gently with your palm in between applications to disperse the HAIRATIN fibers. You may also use a comb or brush to gently style the applied area.

CROWN AREA: With a wall mirror behind you, hold up a handheld mirror in the front to see your crown area in the wall mirror. Or you may face the wall mirror and hold up a handheld mirror close to the crown area.

FRONTAL AREA: place the HAIRATIN Optimizer under the hairline to keep it from getting onto your skin.

Apply the HAIRATIN mist spray to secure from sweat, wind and rain.

REMOVAL:

Any shampoo will remove HAIRATIN fibers. If the fibers get on your hands, just wash with water. If it falls on your clothes, just dust it off, it will not leave any stain.

COMMON MISTAKES:

MISTAKE 1: Haste

If you are a first time user, go slow and gently shake the bottle so that the minimum amount of fibers fall into the existing hair, and work your adding more but little by little.

MISTAKE 2: Hair looks "dusty"

Don't put on too much and remember to disperse HAIRATIN by gently patting the applied area to remove excess and help Fibers bond with your existing hair.

MISTAKE 3: Hair is too thin and short.

Your hair must be at least half inch long for HAIRATIN to be effective. If your hair is very thin, we suggest you apply less product and little by little. Do not worry if some comes into your scalp, it will still be undetectable. Do not use on completely bald area as HAIRATIN Fibers is design to attach onto your existing hair.

WARNINGS

For external use only. Keep out of reach of children. If in contact with eyes, just wash out with water.
